STATINTL Dear

We are a VM user with considerable concern for security. The need for caveated listings has been a requirement that has not been addressed by the current version of IBM's VM/370 Release 6 ESSBP. I understand that your organization has made significant modifications to allow user controlled facility for caveated listings. Such a facility in VM would help us greatly enhance our capability to serve our users. If at all possible I would greatly appreciate if I could get a copy of the modifications necessary to VM to allow caveated listings. If that is possible, to expedite matters, [REDACTED] has indicated that he would deliver them to our SHARE installation representative, Gregory Ishizaki at the next SHARE meeting in Anaheim, CA.

STATINTL

Thank you,
